Auditor's report on the separate financial statements

To: The Shareholders' of Maridive & Oil Services Company

Report on the financial statements

We have audited the accompanying separate financial statements of Maridive & Oil Services Company "an Egyptian Joint Stock Company – Free Zone Company", which comprise the separate statement of financial position as of 31 December 2022 and the related statements of profit or loss, comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

These separate financial statements are the responsibility of Company's management. Management is responsible for the preparation and fair presentation of these financial statements in accordance with the Egyptian Accounting Standards, and in the light of the prevailing Egyptian laws, management responsibility includes, designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; management responsibility also includes selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these separate financial statements based on our audit and except for the effects of the matters described in the basis for qualified opinion paragraphs (A, B, C, D and E), We conducted our audit in accordance with the Egyptian Standards on Auditing and in the light of the prevailing Egyptian laws except for the effects of the matters described in the basis for qualified opinion. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the separate financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the separate financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the separate financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the separate financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Basis for Qualified Opinion

A. As stated in Note No. (17) of the notes to the separate financial statements, the company's management did not provide us with some bank confirmations with a total amount of USD 174,176 at December 31, 2022, for Abu Dhabi Islamic Bank, Commercial International Bank, Credit Agricole Bank ,Arab African Bank and Cairo Bank. We were not able to perform any alternative audit procedures to assure the completeness of transactions and balances with these banks.

B. As stated in Note No. (19) of the notes to the separate financial statements, the company's management did not provide us with loan bank confirmations with a total amount of USD 702 257 at December 31, 2022, for HSBC Bank. We were not able to perform any alternative audit procedures to assure the accuracy and completeness of the balances with these banks.

C. As stated in Note No. (19) of the notes to the separate financial statements, the company has not committed to paying the installments due for the existing loans at December 31, 2022, according to the schedule agreed upon in the contracts of these loans that due to HSBC Bank in addition to the company's failure to fulfill the financial commitments for those loans until December 31, 2022.

D. As stated in Note No. (23) of the notes to the separate financial statements, there is a balance due from a related party "Ocean Marine Company" (a subsidiary company) in the amount of USD 31 135 113 at December 31, 2022. The company has doubt to collect this balance in light of the financial statements of the subsidiary company. The company did not provide us with an impairment study of this debit balance to assess the potential impact on the company's separate financial statements.

E. The company did not comply with the requirements of Egyptian Accounting Standard No. (47) "Financial Instruments" which should be applied for the financial periods beginning on or after January 1, 2021. We were not able to perform any alternative procedures to verify the potential financial impact on the separate financial statements as a result of non-compliance with that standard.

Qualified Opinion

Except for the effects of the matters described in the basis for qualified opinion, the accompanying unconsolidated financial statements present fairly, in all material respects, the unconsolidated financial position of Maridive and Oil Services Company as of December 31, 2022, and its unconsolidated financial performance and its unconsolidated cash flows for the year then ended in accordance with the Egyptian Accounting Standards and in the light of the Egyptian laws and regulation.

Emphasis of matter

Without considering this as a qualification to our opinion as detailed in Note No. (29), we bring attention to the fact that the company has a net loss of USD 13.5 M for the financial year ended on December 31, 2022,with accumulated losses amounted to USD 247.4 which exceeded the half of total equity and on that date it had current liabilities exceeded current assets by an amount of USD 79.9 M and these circumstances indicate the existence of a significant uncertainty that may lead to a doubt in the company's ability to continue as a going concern the company financial statements have been prepared on the assumption that it will continue to practice its authority. Through new contracts with the customers and the purchase offer to acquire one of the company's subsidiaries which has accumulated losses for several years, so that will positively affect the company's activity result in the foreseeable future.

According to article no.(69) of the companies' law no.(159) of 1981 and its amendments ,an Extra-Ordinary General Assembly meeting has to be held to decide on the company's continuing as a going concern.

Report on Other Legal and Regulatory Requirements

The Company keeps proper accounting records, which include all that, is required by law and by the statutes of the Company, and the separate financial statements, are in agreement therewith. The Company maintains proper costing accounts; the inventory physical count was performed by the Company's management in accordance with methods in practice.

The financial information contained in the Board of Directors' report on the financial year ended December 31, 2022, prepared in accordance with companies' Law No. 72 of 2017 and its executive regulations in agreement with the Maridive and oil services accounting records within the limit that such information is recorded therein.

1. Reporting entity

Maridive and Oil Services S.A.E. Company – an Egyptian Joint Stock Company – was established under the framework of the provisions of the Arab and Foreign Investment and Free Zones Law No. 43 of 1974 which was replaced by the Investment Law No. 230 of 1989 and subsequently replaced by the Investment Guarantees and Incentives Law No. 8 of 1997. And replaced by law No. 72 of 2017 The Ministerial Decree of the incorporation of the Company and its articles of incorporation were published in the Egyptian Gazette Issue No. 29 dated March 19, 1978.

The Company is registered in commercial registry under No. 19564 on 19 March 1978.

The license for the company's operation has been extended for five years starting 20 July 2017 according to the decision no.27/ 2017 granted from the general authority for investment and free zone dated 21 August 2017.

Address of the Company is Plot 13-line F, General Free Zone, Port Said – Arab Republic of Egypt.

In 1993, the Company established a branch in Abu Dhabi in the United Arab Emirates; which was registered under No. 25391 dated June 26, 1993.

2. The Company's purpose

A) The purpose of Maridive and Oil Services S.A.E. is to provide in the free zone of the Arab Republic of Egypt all marine services, including the supply of services, maintenance, construction, establishment, and rescue operations whether under or above the level of the sea.

B) All works related to manufacturing services for marine and land establishments including cleaning, maintenance, construction, transportation, supplies and all related equipment and spare parts required for those services.

C) Owning and renting launches, marine loaders, supplying ships and all marine equipment.

D) The company may benefit or participate by any kind with individuals and companies which have the same similar work, or which may cooperate in reaching objectives. Also, the company may merge with previously mentioned companies or acquire them. In addition, the company has the right to establish specialized companies in relation to its various activities. All the above decisions must be approved by the investment and zone general authority.

3. Basis of preparation

3.1 Statement of compliance

The separate financial statements for the year ended December 31, 2022 have been prepared in accordance with Egyptian Accounting Standards (EAS), and in the light of the prevailing Egyptian laws.

The financial statements were authorized for issue by the Board of Directors on May 14, 2023.

3.2 Basis of measurement

The financial statements have been prepared on the historical cost basis except for the following material item in the balance sheet:
Non-derivative financial instruments at fair value through profit or loss are measured at fair value.

3.3 Use of estimates and judgments

The preparation of the financial statements in conformity with Egyptian Accounting Standards requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

3.4 Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

The Company has an established control framework with respect to the measurement of fair values. This includes a valuation team that has overall responsibility for overseeing all significant fair value measurements, including fair values, and reports directly to the chief financial officer.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the valuation team assesses the evidence obtained from the third parties to support the conclusion that these valuations meet the requirements of EAS, including the fair value hierarchy in which the valuations should be classified.

Significant valuation issues are reported to the Company's audit committee.

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible.

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

(All amounts are in US dollar unless otherwise stated)

1- Abu Dhabi Islamic Bank - UAE

On January 15, 2016, the company's board of directors agreed to conclude an Islamic facility contract with Abu Dhabi Islamic Bank - UAE - with a maximum amount of USD 225 million (two hundred twenty-five million US dollars) to restructure the existing facilities and finance the purchase of new marine units in addition to the amount of USD 25 million (twenty-five million US dollars) to finance the working capital of the company, including all interests, commissions, expenses, costs and any other amounts due to lenders in accordance with the aforementioned credit facility contract between the company and both Abu Dhabi Islamic Bank (UAE) and a group of other banks and financial institutions and the conclusion of documents to ensure the implementation of the company's obligations under the Islamic facility contract according to the following:

a. The interest rate is 4.5% in addition to the labor rate (three months), which is the same as the current interest rate.

B. Paid 80% of the loan amount over seven years and pay the remaining 20% as a single payment at the end of the loan term.

c. Any payments from the company's cash surplus over the term of the loan are deducted from the above-mentioned 45%.

d. The loan contract includes some financial commitments that the company must abide by as follows:

1. The debt service coverage ratio shall not be less than 0.25:1
2. The interest coverage ratio shall not be less than 2.25:1
3. The net leverage ratio shall not be more than 2:1
4. The debt to equity ratio shall not be more than 1.5:1

- On January 31, 2021, the company communicated the group of joint banks with the amended financial studies to restructure the current facilities in line with the company's current situation, and the studies are still within the scope of review by the joint banks and their financial analysts.
- During the subsequent period, the company addressed the bank to obtain a letter of forgiveness for non-compliance with the above financial commitments, and the bank accepted the company's request on January 24, 2022 by e-mail.

2- HSBC Bank

The company has entered into a financing contract with HSBC, a medium-term loan of $19 million. This loan is subject to a financing return calculated based on the labor rate every three months, in addition to a margin of 4.5% annually, and the loan is repaid in 28 monthly installments.

3- European Bank for Reconstruction and Development

On April 13, 2017, a loan contract was signed with the European Bank for Reconstruction and Development in the amount of 50 million US dollars in 3 tranches as follows:

a. The first tranche in the amount of $25 million to complement the uncompleted portion of the syndicated loan previously arranged by a bank
Abu Dhabi Islamic This segment is concerned with financing the company's expansion plan to purchase new marine units.

b. The second tranche in the amount of $15 million is to repay part of Abu Dhabi Islamic Bank's share of the syndicated loan.

c. The third tranche is in the amount of $10 million to finance the company's working capital.

- The loan contract includes some financial commitments that the company must comply with as follows: -

1. The debt service coverage ratio shall not be less than 0.25:1
2. The interest coverage ratio shall not be less than 2.25:1
3. The net leverage ratio shall not be more than 2:1
4. The debt-to-equity ratio shall not be more than 1.5:1

4- Attijari wafa bank (formerly Barclays)

A medium-term loan of 3.5 million US dollars to finance working capital requirements at an annual interest rate of 3% above the LIBOR rate in 3 months and a commission on the highest debit balance of 0.05% per month, to be paid in 25 monthly installments.

(All amounts are in US dollar unless otherwise stated)

5- Reassess – loans contract agreement

26- Previous Years Adjustments - Adjustments to Retained Losses

The company evaluated one of its subsidiaries (Valentine Maritime Ltd.), which achieved net losses for several previous years, which indicates a decline in the value of this investment. Therefore, the company obtained a study of the market value (fair value) of the subsidiary company through an independent financial advisor, which is the Fenby Office for Financial and economic Consulting . The study resulted in an estimate of the negative market value of the investment, which indicates the decline in the value of the investment in the entirety of the Maritime and Petroleum Services Company - Maridive in its subsidiary Valentim Maritime Ltd.

(All amounts are in US dollar unless otherwise stated)

Retained losses	(19 748 377)	(170 826 600)	(190 574 977)

27. Financial instruments
Financial risk management
Overview
The Company has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

Risk management framework
The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The audit committee is responsible for developing and monitoring the Company's risk management policies. The committee reports regularly to the Board of Directors on its activities.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

(All amounts are in US dollar unless otherwise stated)

The Company's audit committee oversees how management monitors compliance with the Company's risk management policies, procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Company's audit committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the audit committee.

Credit risk
Credit risk is the risk of financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the company's customers and investment securities.

The carrying amount of financial assets represents credit exposure. The exposure to credit risk at the end of the reporting period was as follows:

	Note	31 December 2022	31 December 2021
Trade receivables	15	13 712 048	16 819 304
Debtors and other debit balances	16	3 858 958	3 784 834
Due from subsidiaries companies	23-1	35 394 762	28 527 592
Cash at bank	17	1 366 839	146 332
		54 332 607	**49 278 062**

Trade and other receivables
Creditworthiness for Trade and other receivables based on a credit policy set by the Board of Directors Committee.
The company monitoring the credit risk of the customers by collecting debtors and other debit balance according to their classifications, credit position and the guarantees provided by him. And customer balances are more than 60 days, most of which represent the balances of government agencies.

Cash and cash equivalents
The Company held cash and cash equivalents of USD 1 366 839 at December 31, 2022 (December 31, 2021: USD 146 332), which represents its maximum credit exposure on these assets. The cash and cash equivalents are held with bank and financial institution counterparties.

Liquidity risk
Liquidity risk is the risk that the company will not be able to meet its financial obligations as they fall due. The company's approach to managing liquidity is to ensure, as far as possible, that it will always have Sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the company's reputation.

The Company uses activity-based costing to cost its products and services, which assists it in monitoring cash flow requirements and optimizing its cash return on investments. The Company aims to maintain the level of its cash and cash equivalents and at an amount in excess of expected cash outflows on financial liabilities Except creditors for the period of time 60 days.
The Company also monitors the level of expected cash inflows on debtors and other debit balances together with expected cash outflows on creditors and others credit balances, at December 31, 2022.

(All amounts are in US dollar unless otherwise stated)

The maturity dates of financial obligations according to the expected repayment schedules are as follows:

December 31, 2022	Book value	12 months or less	1-2 Years	2-5 Years
Banks - credit facilities	17 841 326	17 841 326	-	-
Long Term Loans	220 406 886	4 841 087	215 565 799	-
Suppliers, notes payable & other credit balances	39 393 109	39 393 109	-	-
Due to related parties and subsidiaries	44 434 378	44 434 378	-	-
	322 075 699	**106 509 900**	**215 565 799**	**-**

December 31, 2021	Book value	12 months or less	1-2 Years	2-5 Years
Banks - credit facilities	18 791 649	18 791 649	-	-
Loans	195 291 171	59 512 549	135 778 622	-
Suppliers, notes payable & other credit balances	65 387 497	65 387 497	-	-
Due to related parties and subsidiaries	37 895 811	37 895 811	-	-
	317 366 128	**181 587 506**	**135 778 622**	**-**

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimizing the return. The company incurs financial liabilities, in order to manage market risks. All such transactions are carried out within the guidelines set by B.O.D committee.

Interest rate risk

Interest rate risk is represented in fluctuation of interest rates on the facilities granted to the company by the banks. This risk is covered through getting the best available interest rate in the market on the credit facilities as well as determining fixed interest rate on the loans.

Capital management

The Board's policy is to maintain a strong capital base to maintain investor, creditor and market confidence and to sustain future development of the business. The Board of Directors monitors the return on capital, which the company defines as net operating income divided by total shareholders' equity. The Board of Directors also monitors the level of dividends to shareholders. There were no changes in the company's approach to capital management during the year.

Currency risk

The company is exposed to currency risk on sales and financial assets that are denominated in a foreign currency. The currency in which these transactions are primarily denominated is the US Dollars and Euro.

In respect of monetary assets and liabilities denominated in other foreign currencies, the company ensures that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

28. Statement of Cash flow

Some of the transactions were eliminated when preparing the cash flow statement as these transactions are considered non-cash transactions

29. Going concern

The company achieved a net loss of at USD 13 539 529 for the year and a total carry forward loss of USD 247 383 001 at December 31, 2022, and on that date current liabilities exceeded current assets by an amount of USD 79 861 584 and these circumstances are in addition to other matters Detailed in Clarification No. (19) indicates the existence of significant uncertainty that may lead to material doubts about the company's ability to continue its activity. The company is currently evaluating the current situation of the company and its ability to fulfill its contracts and obligations with customers and banks, evaluating the company's current operating conditions and adhering to the periodic maintenance schedules for the marine units.

And work to obtain new customer contracts as well as accepting the offer submitted to acquire one of its subsidiaries that achieved carry-over losses over several years, which may positively affect the company's results during the coming years and in implementation of the requirements of Article No. (69) of Companies Law No. 159 of 1981 and its implementing regulations, An extraordinary general assembly of the company will be called to consider the continuity of the company. These financial statements have been prepared on the assumption that the company will continue to practice its activities..

30. Significant events during the year

The Central Bank of Egypt decided, in its meeting held on October 27, 2022, to move the exchange rate of foreign currencies to give flexibility to banks operating in Egypt to price the purchase and sale of foreign exchange within legal channels.

Accordingly, the values of the balances of monetary assets and liabilities in foreign currencies in the subsequent period may differ materially from the value recorded in the financial statements for the fiscal year ending on December 31, 2022. Also, the company's business results may be affected materially in subsequent periods as a result.

31. Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these separate financial statements.

31.1 Foreign currency

- **Foreign currency transactions**

Transactions in foreign currencies are translated to the respective functional currency at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date.

Non-monetary assets and liabilities that are measured at fair value in a foreign currency are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Non-monetary items in a foreign currency that are measured based on historical cost are translated using the exchange rate at the date of the transaction.

Foreign currency differences arising on retranslation are generally recognized in profit or loss.

Foreign currency differences arising on retranslation are generally recognized in profit or loss except for the translation related to financial statements are recognized in the other comprehensive income.

31.2 Financial instruments

Non-derivative financial assets

The initial recognition of loans, receivables and deposits on the date of their inception. All other financial assets (including assets at fair value through profit or loss) are recognized first on the date of the transaction, at which time the Company is a party to the contractual provisions of the instrument.

The company excludes the financial asset when its contractual rights to the cash flows of this asset expire, or it transfers the right to receive the contracted cash flows of this asset in a transaction through which all the risks and returns of ownership of this financial asset are transferred. Any interest in such a transferred financial asset that may arise or be retained by the Company is recognized as an asset or a liability separately.

Financial assets and liabilities are set off and the net value is shown in the financial position only when the company has the legal right to make this set-off and the intention to settle on the basis of net value or to realize the financial asset and terminate the financial obligation at the same time. The company classifies non-derivative financial assets into the following items: loans and debts.

Loans and debts

Loans and receivables are financial assets with a fixed or determinable repayment date that are not traded in an active market. These assets are initially recognized at fair value, plus transaction costs directly attributable to them. After initial recognition, loans are measured at amortized cost using the effective interest method, and impairment losses are discounted.

In general, receivables and other short-term debit balances without a stated interest rate are measured at their face value (the invoice value) and any provision for doubtful debts is deducted.

It includes loans and receivables, cash and cash equivalents, customers, receivables and other debit balances.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and time deposits with original maturities of three months or less from the acquisition date that are subject to an insignificant risk of changes in their fair value, and are used by the Company in the management of its short-term commitments.

Non-derivative financial obligations
The first financial obligations issued for indebtedness and subordinated obligations are recognized on the date of their creation. All other financial liabilities at the date of the transaction (including commitments at fair value through profit and loss) are initially recognized when the company is a party to the contractual provisions of the instrument.

The company excludes the financial obligation when it is exempted, canceled or its contractual obligations expire.

The company classifies non-derivative financial liabilities in other financial liabilities. The former is recognized at its fair value, plus transaction costs directly attributable to it. After initial recognition, financial liabilities are measured at amortized cost using the effective interest method, and include financial liabilities, loans and advances, bank overdrafts, suppliers and other credit balances.
Bank overdraft balances paid on demand and which form part of the company's fund management are included as a component of cash and cash equivalents when preparing the statement of cash flows.

31.3 Capital

Authorized Capital
The Company's authorized capital is determined to be USD 1 000 000 000 (1 Billion US Dollar).

Issued and paid up capital
The Company's issued and paid up capital is amounted to USD 188 102 296 divided into 470 255 740 shares at par value 40 Cent each, and have been fully paid and marked on the Commercial Register.

31.4 Property, plant and equipment

Recognition and measurement
Items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labor and any other costs directly attributable to bringing the asset to a working condition for their intended use also, when the Company has an obligation to remove the asset or restore the site, an estimate of the costs of dismantling and removing the items and restoring the site on which they are located and capitalized borrowing costs.

Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment .The cost of borrowing related the acquisition, establishment or manufacturing of any asset is recognized in profit or loss when they are incurred.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognized in profit or loss.

Subsequent costs
Subsequent expenditure is capitalized only when it is probable that the future economic benefits associated with the expenditure will flow to the Company and highly accuracy measurement . Ongoing repairs and maintenance is expensed as incurred

(All amounts are in US dollar unless otherwise stated)

Depreciation
Items of property, plant and equipment are depreciated on a straight-line basis over the estimated useful lives of each component. Land is not depreciated.
The estimated useful lives as follows:

Class	Useful life after adjustments
Buildings	%2
Decorations & exhibition equipment	%10
Marine units	%2.5
Marine refurbishments	%40 - %20
Tools and Equipment	%20
Means of transportation	%20
Furniture & office equipment	%15

The depreciation of the asset begins when the asset is usable for the purpose for which it was intended. On the date of the financial statements, the methods of depreciation, the useful lives of the assets and their residual value are reviewed.

During the year 2015, the productive lives of the company's fixed assets were re-estimated for the marine units item, in accordance with the decision of the Board of Directors. January 2015.

31.5 Projects under construction
Expenditures incurred on purchasing and constructing fixed assets are initially recorded in projects under construction until the asset is completed and becomes ready for use. Upon the completion of the assets, all related costs are transferred to fixed assets. Projects under construction are measured at cost less accumulated impairment losses. No depreciation is charged until the project is completed and transferred to fixed assets.

31.6 Intangible assets
Intangible assets are measured at cost, which is the cash price at the date of recognition. In the event of deferment of payment for periods exceeding the normal credit period, the difference between the cash price and the total amount paid is recognized as interest. Intangible assets are presented net of depreciation and impairment losses. Subsequent expenditures on the acquisition of intangible assets are capitalized only when such expenditures increase the future economic benefits of the asset or assets. All other expenses are charged to the income statement when incurred. Intangible assets are depreciated on a straight line basis over the useful lives of the intangible assets. If the useful life of intangible assets is indefinite, impairment testing is performed on a regular basis at each balance sheet date. Intangible assets are depreciated from the date on which they are available for use and have an estimated useful life of 5 years.

31.7 Investment in subsidiaries

Investments in subsidiaries are accounted for in the company's separate financial statements using the cost method, whereby investments in subsidiaries are recognized at acquisition cost less impairment in value. The impairment is estimated for each investment separately and is recorded in the statement of profit and loss. Subsidiaries are the companies controlled by the company when the investor achieves all of the following:

- Authority over the investee.
- Exposure or the right to variable returns through its participation in the investee.
- The ability to use its power over the investee to influence the amount of returns it receives from it.

The company shall reassess control over the investee if facts and circumstances indicate that there are variables to one or more of the three elements of control mentioned above.

For subsidiaries "structured entities", there is no cost recognized in the company's separate financial statements, so the nature and risks of these subsidiaries "structured entities" are disclosed in the company's separate financial statements as related parties.

31.8 Inventories

The inventory of spare parts and fuel is recorded at cost and the cost of the inventory includes the purchase price and all other expenses related to spare parts until they reach the stores, and the cost of inventory is determined according to the weighted average method; The cost of inventory is charged to operating costs. Inventory is valued at the end of the year at cost according to the weighted average method or at net realizable value, whichever is lower.

31.9 Impairment

Non - derivative financial assets

A financial asset not classified as at fair value through profit or loss, including an interest in an equity accounted investee, is assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset, and that the loss had an negative impact on the estimated future cash flows of that asset that can be estimated reliably.

Non-financial assets

The carrying amounts of the Company's non-financial assets, other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.
For intangible assets that have indefinite useful lives, the recoverable amount is tested annually for impairment.

An impairment loss is recognized if the carrying amount of an asset or cash – generating unit (CGU) exceeds its recoverable amount.

Impairment on financial assets

Group companies assess at each balance sheet date whether there is objective evidence that a financial asset is impaired. Impairment of the value of a financial asset and losses resulting from impairment are borne only if there is objective evidence of impairment as a result of the occurrence of one or more events after the initial recognition of the asset and this event or these events had an impact that can be reliably evaluated on the expected future cash flows of the financial asset. For financial assets carried at amortized cost, the impairment loss is the difference between the carrying amount of those assets and the present value of future cash flows, discounted at the original effective interest rate of the financial asset. The book value of the financial asset is reduced directly, except for customer accounts, which are reduced in value using a provision, and debts that are confirmed not to be collected through this provision are written off.

The value of the losses recognized by the shall be refunded either directly or by settling the allowance account and such cancellation shall not create a book value of the financial asset that exceeds the amortized cost at the date of derecognition of the impairment losses if such impairment losses had not been recognized. The value of the derecognition is recognized in profit or loss. this is. The value of the derecognition is recognized in profit or loss.

In accordance with the decision of the company's board of directors dated June 14, 2017, it was approved to amend the policy of the group companies in the formation of impairment losses related to customer balances to become in accordance with the following:

1- 30% of the invoice balance after one year from the due date of collecting the invoice
2- 30% of the invoice balance after two years from the due date of collecting the invoice
3- 40% of the invoice balance after three years from the due date of collecting the invoice

It should be noted that on May 5, 2018, the resolution was unanimously approved by the company's Ordinary General Assembly

31.10 Provisions

A provision is recognized only when the Group has a present legal or constructive obligation as a result of a past event and an outflow of economic resources is expected to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision must express the best estimate of the expenditures required to settle the present obligation at the date of the financial statements, taking into account the risks and uncertainties surrounding the value to be recognized as a provision. When the effect of the time value of money is material, the amount recognized as a provision It is the present value of the amounts expected to settle the obligation. When it is expected that some or all of the expenses required to settle a provision will be recovered from another third party, the reimbursement is recognized as an asset when it is certain that the reimbursement will take place, with the possibility of reliably measuring the reimbursement amount.

31.11 Dividends

Dividends are recognized as a liability in the period in which the distribution is announced.

31.12 Employee benefits

Defined contribution plans

The company contributes to the governmental social insurance system for the benefit of its employees in accordance with the Social Insurance Law." According to this law, the employees and the company contribute to the system in a fixed percentage of wages, and the company's obligation is limited to the value of its contribution, and the company's contributions are charged to the income statement according to the accrual principle.

Employees profit share

According to the articles of association, the company pays a percentage of the cash dividends as a share to the employees in the profits in accordance with the rules proposed by the company's board of directors and approved by the general assembly. .

31.13 Revenue

Egyptian Accounting Standard No. 48 "Revenue from Contracts with Customers"

The Company evaluates the goods or services promised in the contract with the customer and identifies them as a performance obligation if those services are:

1. A different good or service.
2. A series of different services that are substantially the same and have a similar pattern of transmission to the customer (ie each different service is completed over time and the same method is used to measure the progress of fulfillment of the obligation).

Revenue from contracts with customers is recognized by the company based on five step modules as identified in EAS No. (48):

Step 1: Determine the contract (contracts) with customer: A contract is defined as an agreement between two or more parties that meets the rights and obligations based on specified standards which must be met for each contract.

Step 2: Determine the performance obligations in contract: Performance obligations is a consideration when the goods and services are delivered.

Step 3: Determine the transaction price: Transaction price is the compensation amount that the company expects to recognize to receive for the transfer of goods or services to customer, except for the collected amounts on behalf of other parties.

Step 4: Allocation of the transaction price of the performance obligations in the contract: If the service concession arrangement contains more than one performance obligation, the company will allocate the transaction price on each performance obligation by an amount that specifies an amount against the contract in which the company expects to receive in exchange for each performance obligation satisfaction.

Step 5: Revenue recognition when the entity satisfies its performance obligations.

The company satisfy the performance obligation and recognize revenue over time, if one of the following criteria is met: -

a- Company's performance does not arise any asset that has an alternative use of the company and the company has an enforceable right to pay for completed performance until the date.
b- The company arise or improves a customer-controlled asset when the asset is arising or improved.
c- The customer receives and consumes the benefits of company's performance at the same time as soon as the company has performed.

d- For performance obligations, if one of the above conditions is met, revenue is recognized in the period in which the company satisfies performance obligation.

When the company satisfies performance obligation by providing the services promised, it creates an asset based on payment for the contract performance obtained, when the amount of the contract received from customer exceeds the amount of the revenue recognized, resulting advance payments from the customer (contractual obligation)

Revenue is recognized to the extent that is potential for the flow of economic benefits to the company, revenue and costs can be measured reliably, where appropriate.

The application of Egyptian Accounting Standard No. 48 requires management to use the following judgements:

Satisfaction of performance obligation
The company should assess all contracts with customers to determine whether performance obligations are satisfied over a period or at a point in time in order to determine the appropriate method for revenue recognition. The company estimated that, and based on the agreement with customers, the company does not arise asset has alternative use to the company and usually has an enforceable right to pay it for completed performance to the date.
In these circumstances, the company recognizes revenue over a period, and if that is not the case, revenue is recognized at a point in time for the sale of goods, and revenue is usually recognized at a point in time.

Determine the transaction price
The company has to determine the price of the transaction in its agreement with customers, using this judgement, the company estimates the impact of any variable contract price on the contract due to discount, fines, any significant financing component in the contract, or any non-cash contract.
Control transfer in contracts with customers
If the company determines the performance obligations satisfaction at a point of time, revenue is recognized when control of related contract' assets are transferred to the customer.

In addition, the application of Egyptian Accounting Standard No. 48 has resulted in:

Allocation of the transaction price of performance obligation in contracts with customers:
The company elected to apply the input method to allocate the transaction price to performance obligations accordingly that revenue is recognized over a period of time, the company considers the use of the input method, which requires recognition of revenue based on the company's efforts to satisfy performance obligations, provides the best reference to the realized revenue. When applying the input method, the company estimates

efforts or inputs to satisfy a performance obligation, in addition to the cost of satisfying a contractual obligation with customers, these estimates include the time spent on service contracts.

Revenue sources	**Revenue recognition**
Marine unit's rental	At point of time
Supplying food for crews of marine units and other revenues	At point of time

Income from renting marine units
Revenue is measured based on considerations specified in contracts with customers and excludes amounts collected on behalf of third parties. The company recognizes revenue when the service is provided to the customer, on delivery to the customer.
If the consideration promised in the contract includes a variable amount, the company estimates what fees it is entitled to for services rendered to the customer.

Contract revenue
Revenue is measured based on considerations specified in contracts with customers and excludes amounts collected on behalf of third parties. The company recognizes revenue when the good is delivered to the customer, on delivery to the customer.
If the consideration promised in the contract includes a variable amount, the company estimates what it is entitled to in exchange for transferring the promised goods or services to the customer.

Credit interest and other income
Credit interest is recognized using the effective interest rate method, and other income is recognized on an accrual basis.

31.14 Expense recognition

Expenses are recognized in profit or loss when there is a decrease in future economic benefits due to a decrease in an asset or an increase in a liability" and can be measured with confidence. This means, in fact, that the recognition of expenses takes place simultaneously with the recognition of an increase in liabilities or a decrease in assets. Expenses are recognized in the income statement on the basis that there is a direct correlation between costs incurred and revenue earned (corresponding to costs with revenue).

When economic benefits are expected to arise over many accounting periods" and the association with income can be determined generally or only indirectly, the expenses must be recognized in the income statement on a regular and reasonable basis for distribution.

The expense is recognized immediately in the income statement "when the expense does not generate any future economic benefits or when the future economic benefits do not qualify" or no longer qualifies; to be recognized as an asset in the financial statements.

31.15 Fair value measurement

A number of the Company's accounting policies and related disclosure requirements require the determination of the fair value of financial and non-financial assets and liabilities. The fair value is determined for measurement or disclosure purposes, and the notes complementing the financial statements of assets and liabilities are disclosed, whenever possible, about any additional information about the assumptions used in determining the fair value in the notes for those assets and liabilities.

Other intangible assets

The fair value of other intangible assets is determined based on the discounted cash flows expected to be obtained from the final use and sale of the assets.

Dividend

Dividends are recognized as a liability in the financial period in which the dividends are approved by the shareholders general assembly meeting

Trade receivables

Trade receivables are initially recognized at fair value and subsequently at amortized cost using the effective interest method less the provision for impairment of those receivables. The provision for impairment of the value of debtors is formed when there is objective evidence that the company will not be able to collect all the amounts due according to the original terms of the contract, and the impairment represents the difference in the book value and the present value of the expected cash flows. The cash flows are discounted using the effective interest rate. The book value is reduced by using the allowance for impairment and the loss is recorded in the income statement. When the balances of trade receivables are not collected, they are written off using the provision created, and when those amounts previously destroyed are collected, they are included in the income statement.

Trade payables

Commercial creditors generally prove the value of the goods and services received from third parties, whether invoices are received for them or not. When this is significant, the goods and services received as well as trade creditors are recognized at the present value of the expected cash outflows using the interest rate of identical loans, and trade creditors are subsequently stated at amortized cost using the effective interest rate method.

31.16 Lease contracts

At the outset of the contract, the company assesses whether the contract is a lease or includes a lease. The contract is a lease or includes a lease if the contract conveys the right to control the use of a specific asset for a period of time in exchange for consideration. To assess whether a lease conveys the right to control the use of a specific asset, the Group uses the definition of a lease in Egyptian Accounting Standard No. (49).

This policy applies to contracts concluded since or after the establishment of the company.

Lessee

On initiation or upon modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on a pro-rata basis, however, for real estate leases, the Group has elected not to separate the non-lease components and accounting for the lease and non-lease components as the lease component single.

The Group recognizes a right-of-use asset and a lease liability on the date of the lease inception. The usufruct asset is initially measured at cost, which includes the initial amount of the lease obligation and is settled by any amounts paid on or before the date of the contract inception, plus any initial direct costs incurred and the estimated costs of dismantling and removing the underlying asset or restoring the asset itself or the location in which it is located. The asset, less any rental incentives received.

The usufruct asset is subsequently depreciated using the straight-line method from the date of the contract inception until the end of the lease term, unless the lease transfers ownership of the underlying asset to the group at the end of the lease term, or if the cost of the usufruct asset reflects that the group will exercise the purchase option, In this case, the usufruct asset is depreciated over the useful life of the asset, which is determined on the same basis for real estate and equipment. In addition, the usufruct asset is periodically reduced by the value of the impairment losses, if any, and is adjusted by re-measuring the lease liability.

The lease liability is initially measured at the present value of the lease payments not paid at the commencement date of the contract, discounted using the interest rate implicit in the lease, or, if that rate cannot be readily determined, the Group's incremental borrowing rate should be used. Generally, the Group uses its incremental borrowing rate as the discount rate.

The Group determines the incremental borrowing rate by obtaining interest rates from various external sources of financing and making certain adjustments to reflect the terms of the lease and the type of asset being leased.

The lease payments included in the lease liability measurement consist of the following:
(a) Fixed payments, which include essentially fixed payments.
B- Variable lease payments that depend on an index or a rate, and were initially measured using the index or rate at the start of the lease contract.
C- Amounts expected to be paid by the lessee under residual value guarantees.
(d) the exercise price of a purchase option if the group is reasonably certain to exercise that option, lease payments in the optional renewal period if the group is reasonably certain to exercise an extension option, and penalties for early termination of the lease unless the group is reasonably certain not to terminate early .

(All amounts are in US dollar unless otherwise stated)

The lease liability is measured at amortized cost using the effective interest method. which is re-measured if there are changes in future lease payments resulting from the dust in an index or rate used to determine those payments, if there is a change in the group's estimate of the amount expected to be paid under a residual value guarantee, if the group changes its assessment of whether to exercise a purchase option extension, termination, or if there is a substantially fixed rent payment.

When the lease liability is re-measured in this way, an adjustment is made to the carrying amount of the right of use asset, or it is recorded in profit or loss if the carrying amount of the right of use asset is reduced to zero.

The Group presents right-of-use assets that do not meet the definition of investment property within property, plant and equipment and lease commitments within loans and advances in the statement of financial position.

Short-term leases and leases of small-value assets
The Group has elected not to recognize right-of-use assets and lease liabilities for leases of small value assets and short-term leases, including information technology equipment. The Group recognizes lease payments associated with these leases as an expense on a straight line basis over the term of the lease.

32. New Editions and Amendments to Egyptian Accounting Standards:

- On March 6, 2023, the Prime Minister's Decree No. (883) of 2023 was issued amending some provisions of the Egyptian Accounting Standards, the following is a summary of the most significant amendments:

New or reissued standards	Summary of the most significant amendments	Potential impact on the financial statements	Effective date
Egyptian Accounting Standard No. (10) amended 2023 "Fixed Assets " and Egyptian Accounting Standard No. (23) amended 2023 "Intangible Assets".	1- These standards were reissued in 2023, allowing the use of revaluation model when subsequent measurement of fixed assets and intangible assets. - This resulted in amendment of the paragraphs related to the use of the revaluation model option in some of the applicable Egyptian Accounting Standards, which are as follows: – Egyptian Accounting Standard No. (5) "Accounting Policies, Changes in Accounting Estimates and Errors". – Egyptian Accounting Standard No. (24) "Income Taxes" – Egyptian Accounting Standard No. (30) "Interim Financial Reporting" – Egyptian Accounting Standard No. (31) "Impairment of Assets" – Egyptian Accounting	Management is currently studying the possibility of changing the applied accounting policy and using the revaluation model option stated in those standards and assessing the potential impact on the financial statements in case of using this option.	The amendments of adding the option to use the revaluation model are effective for financial periods starting **on or after January 1, 2023, retrospectively,** cumulative impact of the preliminary applying of the revaluation model shall be **added to the revaluation surplus account in equity, at the beginning of the financial period in which the company applies this model for the first time.**

(All amounts are in US dollar unless otherwise stated)
